

Greenpeace scam exposed

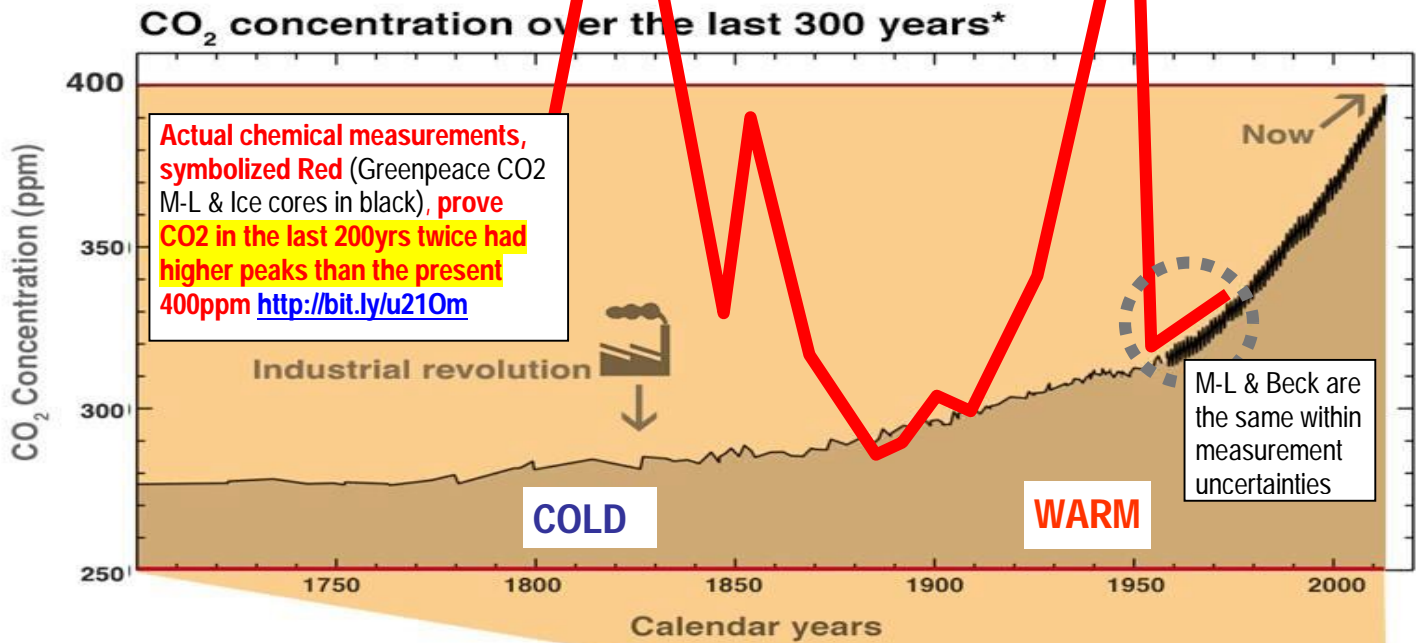

The Dutch-based commercial propaganda business, **Greenpeace**, went into 'unprecedented' delirium 10/11 May as 'Official' levels of the trace-gas CO₂ from the Mauna Loa active volcano site reached 0.04% (grandly termed 400ppm) pic.twitter.com/Yu403FMDDd . Their key claims portrayed in dodgy spin graphs (black below) are false and **disproved by the scientific FACTS** symbolically presented in **Red overlay**.

1. 0.04% levels are not 'unprecedented' but exceeded twice in last 200 yrs – around 1820 in the later 'Dalton' Mini Ice Age and ~1940s, a warm period. Greenpeace, whose profits depend on headline-grabbing propaganda falsify reality by using two different sets of measurements:- recent, from 1958, chemical methods and preceding; ice core methods which lose past CO₂ spikes due to it's diffusion through ice. (Refs Beck 2006 inset, Jaworowski 2007). Scientific chemical measures, **Red**, are close to Mauna Loa and mostly well exceed prior ice-core flattened underestimates.

2. Historically Temperature rises LEAD CO₂

Greenpeace propaganda (black lower graph) confuses cause and effect by ignoring this fact which threatens to terminate much of their income stream and Green surcharge scams of energy companies, governments and carbon-delusion businesses & banks.

*Data from ice-cores until 1958 when records started at the Mauna Loa observatory in Hawaii
